

**INSTITUT
MITTAG-LEFFLER**

THE ROYAL SWEDISH ACADEMY OF SCIENCES

Institut Mittag-Leffler is an international center for research and postdoctoral training in the mathematical sciences

2015-12-09

Professor Bartosz Kwasniewski
University of Southern Denmark,
Campusvej 55
Odense M
Denmark

Dear Bartosz Kwasniewski,

You are cordially invited to participate in the 2016 spring term research program:
“*Classification of operator algebras: complexity, rigidity, and dynamics*” at
Institut Mittag-Leffler during 18 January – 31 January, 2016.

The Organizing Committee and scientific organisers are:

Marius Dadarlat, Purdue University
Søren Eilers, University of Copenhagen
Andrew Toms, Purdue University
Asger Törnquist, University of Copenhagen

The purpose of the Institute’s scientific programs is to promote substantial research by allowing leading mathematicians, in a particular area, to interact among themselves and together with younger mathematicians, in an inspiring and creative atmosphere.

The Institute will provide free housing, on the premises, and participants will be awarded a grant according to Swedish government norms (about SEK 9,000 per month).

Depending on your citizenship and length of stay, you may need a visa to enter Sweden. Please consult the web page of the Swedish Migration Board: www.migrationsverket.se
When applying for a visa, use this letter as a confirmation that you are invited by the Institute.

Visitors are expected to cover their own travel to and from Stockholm. However, the Institute has some limited funds available to assist those visitors whose home institutions or research grants cannot cover their travel costs.

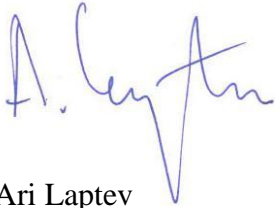

If you have any questions about practical matters, do not hesitate to contact our Secretariat by e-mail: Secretary@mittag-leffler.se

Questions regarding the scientific program should be directed to Professor Søren Eilers at: eilers@math.ku.dk

Please inform the Secretariat as soon as possible, and no later than **16 December**, whether you accept our invitation and the invited period. We try, as far as possible, to meet requests regarding the visit. Finally, please keep us informed of where you can be reached, from now on until you arrive here.

I very much look forward to seeing you at Institut Mittag-Leffler

Yours sincerely,

Ari Laptev
Director of Institut Mittag-Leffler

Institut Mittag-Leffler

Institut Mittag-Leffler is a Nordic research institute for mathematics under the Royal Swedish Academy of Sciences. It is located in Djursholm, a suburb of Stockholm about 8 km northeast of the city center. The main building, originally built by G. Mittag-Leffler during the period 1889-1907, contains offices for visitors and staff, as well as an excellent mathematics library.

Each academic semester a mathematical theme or topic is chosen, and the goal is to promote research in this field. The only scheduled activities are lectures and seminars two afternoons a week, some specifically intended for the younger members of the Institute. The remaining time is free for one's own research, for informal discussions, cooperation, and other forms of interaction.

Senior mathematicians are encouraged to take an interest in the work of junior visitors. Overseas visitors, in particular, are also encouraged to visit other mathematics departments in Scandinavia.
