Operator Algebra colloquium

Bartosz K Kwasniewski
IMADA

Thursday 30 October 2014, 14:15,
IMADAs seminar room

From dynamical systems and operator theory to operator algebras and back

abstract:

The talk is intended to be a generally accessible, not very formal (no hardcore math!), introduction to problems related to the EU Marie Curie-Skłodowska project I will run within the next two years at IMADA. I will focus mainly on ideas, methods and potential applications of the envisaged results.
